

TARIEL PUTKARADZE

ON THE HISTORICAL DYNAMICS OF LINGUO-ETHNICAL SITUATION IN GEORGIA

Traditionally the problem has, hitherto, been seen in three different standpoints: religious-empirical ("The Praise and Glorification"), historico chronicle (Leont Mroveli and logico-scientific.

According to the analysys and comparison of the three different views,the origin of the Georgian people and the source of the Georgian language seems to lie at the same point Namely, since the third millenium B.C. (since the Tower of Babel) Georgian people have live in the Transcaucasia, taking contributions into the world civilisation for 5 thousand years already. As for the formation of the modern Kartvelian (Georgian) languages and tribes it should have been begun from the so-called "languid" centuries of the history of Georgia, at around the end of the old and beginning of the new era.
