### **THE IDEA OF SEEKING FOR THE LOST ESSENCE AND PRESERVING PRIMORDIAL CREATION IN KONSTANTINE GAMSAKHURDIAS WRITINGS**

The idea of seeking for the lost essence and preserving primordial creation is one of the main questions in K.Gamsakhurdia's fiction.

According to the Georgian view the destruction of genetically coded traditions is the necessary condition for death. However, the idea of physical death does not mean perishing of a person. Georgia as a country of the deep past provides an amazing example of preserving primordial creation being realized in the national worldview convincing us in the real perfection of the idea of freedom and eternal comeback.

With old spirit and new essence, the idea of the lost essence and the prime model and of preserving the primordial creation also means the way to salvation.
