POLITICAL SITUATION OF GEORGIA IN THE III-VI CENTURIES ACCORDING TO THE NUMISMATIC MATERIALS

The paper discusses III-VI centuries' numismatic materials. The materials – Sasanidae Iranian drachmas and Byzantine coins, were found in Kutaisi and its neighboring regions. The similar coins are found in the Eastern Georgia as well. As a result of the study and analysis of the coins we can conclude that in the III-VI centuries in the whole Georgia – in the Eastern as well as the Western part of the country, unified money system was operating, that suggests the idea that in this period the Eastern and the Western Georgia were considered one and the same political space
