TYPOLOGICAL SPECIFICITIES OF REPRESENTATION OF CATEGORY OF NUMBER IN GEORGIAN, RUSSIAN AND KAZAKH

The presented paper deals with representation of the category of number of nouns in Russian, Georgian and Kazakh languages.

Our aim is to identify and compare the means of representing the nouns' category of number in non-related languages. The analysis of semantics and that of the means of representing nouns' category of number in Russian, Georgian and Kazakh languages is typologically quite important and interesting. There is no absolute parallelism in terms of formation of the category of number in languages of different systems. Identification of similarities and differences clearly indicate the specificity of languages under question.
