POETIC IMAGE – THE CROWN OF EXISTENCE (ACCORDING TO VAZHA-PHAVELA'S LITERARY LEGACY)

Vazha-Pshavela's literary legacy, his poetry and poetic image elevates us to the crown of existence. The poet understands that not only non-humans as well as human beings – the most intelligent creatures but also objects are marked by invisible and unconscious existence; these marks are already impossible to perceive for universum, let alone a normal human being. The intensity of mountains incorporates a prevailing mystical element, conception and content, and a possibility to see the invisible.

Vazha's poetic image is often mysterious and sublime. It usually reaches the crown of existence later modifying impressions and feelings into spiritual nourishment for humans.

What is most important is that Vazha-Pshavela allowed us – mortals to perceive the highest mind and the crown of existence.
