**HOUSEHOLD LEXICAL ITEMS IN LECHKHUMI DIALECT
(ACCORDING TO MATERIALS OF 2016 ETHNOGRAPHIC EXPEDITION)**

The proposed article provides analysis of a part of dialect vocabulary, i.e. household lexical items, recorded during the ethnographic expedition conducted throughout the villages of Tsageri region in the summer of 2016. Part of these lexical items is not attested in published vocabularies as opposed to another published part, though the meaning of many of the items is altered. The discussed materials provide a clear picture of domestic life of these regions of Georgia, their beliefs and other specificities.
