

MAIA KIKVADZE
PLANT-RELATED LEXICAL UNITS
IN GEORGIAN LANGUAGE OF CHVENEUREBI

In the idiom of Chvенеburebi, the plant-related vocabulary, most of which are medicinal, captures the attention. Folk medicine, and the rules for medical use of herbs was well known to women. It was one big part of their verbal communication within the household.

The names of the plants identified in the texts are structurally different. Simple and composites stems occur. plant-related verbs and converbs are of particular interest.

Today, the names of medicinal plants become gradually forgotten. They are only left in the memory of older generations.
